A wise and an honest man will always mean the same thing, but a fool is a fool, that 20 ways says the same thing. And we see it now 4-days, that Knave lives as he usually upon Fools, as Spiders do upon Flies.

Covetousness is enough to make a Master of the World, as poor as he that has Nothing; for a Man may be brought to a morsel of bread, by Gripping, as well as by Profusion.

Thus 'tis a midwife for those who have enough already, to hazard all for the getting of more, and then upon the miscarriage, to leave himself Nothing.

Buckworth's Loxenges famous for the cure of Coughs, Colds, Catarrhs, Hoarseness, &c. being also a great Cordial, and Sovereign Preservative against all Contagious Distempers. Malignant Air, and unwholesome Weather, approved of by the Chief Physicians of the College, made and Sold by James Shipton an Apothecary at the Sign of the Crown in Hart Street Garden;

A Description of the four Quarters of the Year; and first of Winter.

Sol in Capricorn, Aquarius, Pisces.

According to the custom of Writers in this kind, Winter-quarter is the first quarter, which took beginning the 11 day of December, which time the Sun enter'd into the first degree of the cold and dry sign Capricorn, being the most remote from us, in his farthest South position, causing the days with us to be shortest, and the nights longest. This quarter continues until the Sun hath slowly passed through Aquarius, and Pisces; and doth naturally resemble Old Age.

Of the Spring. Sol in Aries, Taurus, Gemini.

This quarter doth take beginning the 9th of March, at which time the Sun entereth into the first minute of Aries, making equal day and night; and continues whilst the Sun is passing through Aries, Taurus and Gemini. This quarter doth resemble Growing Youth.

Of Summer. Sol in Cancer, Leo, Virgo.

This summer-quarter doth take his beginning when the Sun enters into the first degree of Cancer, which will be this year on the 11 of June; and continues whilst the Sun passeth through Cancer, Leo, Virgo. For the days are longest, and the air hottest; therefore but for necessity, his physics is adieu.

Of Autumn. Sol in Libra, Scorpio, Sagittarius.

Autumn, or Harvest-quarter (commonly called the Fall of the Leaf, as of some the latter Spring) begins when the Sun enters into the first degree of Libra, again making the day and night of equal length; which will be this year the 12 of September, and continues whilst the Sun passeth through Libra, Scorpio, and Sagittarius. This quarter doth fitly resemble Declining Age, and Phlegmatick Complexion.
